Jouni Korhonen, Chair, IEEE P1904.3 Task Force

Email: jouni.korhonen@broadcom.com

Dear Colleagues,

The CPRI cooperation appreciates receiving the liaison about the formation of the IEEE 1904.3 (RoE) Task Force.

Successful cooperation among the leading base station vendors was the foundation of the CPRI specification and made it to a widely deployed interface for all kind of Radio Base Station products released by the CPRI partners. The current CPRI Specification version 6.1 (agreed in July 2014) is available for download from <http://www.cpri.info>. This latest release added the specification of 8Gbps and 12Gbps line rates as enhancements to the previously released LTE-Advanced support.

We appreciate the interest of IEEE 1904 for the CPRI specification and we are looking forward to further updates about the progress of the work in IEEE 1904.3 TF.
