The wording on this line includes the word "the" that would read better without it. The use of "the" here sounds like a specific group, instead of network operators in general.

Propose to change wording to: "cost, network operators increasingly combine optical distribution section..."

Current wording reads: "- Clause 1 provides an overview of the IEEE 1904.2 specifications, including..." The IEEE 1904.2 standard will be generally thought of as a single specification (singular, not plural). i.e. - line 35 also discusses a "specification" (not plural)

Propose to change "specifications" to "specification"

The EtherType that is written 0xA8-C8 should be written without the hyphen, i.e., 0xA8C8.

Change 0xA8-C8 to 0xA8C8. This change is also needed on: p.32, line 4 and line 20; p.47, line 8; p.85, 3rd row of table 8A-2; p.86, 5th row from bottom of table; p.87, lines 3 and 21 of table 8A-4; p.89, 3rd row of Table 8A-6; p.91, 3rd row of table 8A-8; p.89, 9th row from bottom of table 8A-8; p.94, 3rd row of table 8A-10; p.96, 1st row of table at top of page, p.96, 3rd row of table 8A-12; p.98, 1st row of table at top of page. Note: alternatively, the notaion 'A8-C8', i.e., without the '0x' but with the hyphen, can be used.

Terms in "Organizationally Unique 36-bit Identifier (OUI-36)" are misordered.

Change "Organizationally Unique 36-bit Identifier (OUI-36)" to "36-bit Organizationally Unique Identifier (OUI-36)"

The EtherType that is written 0x88-09 should be written without the hyphen, i.e., 0x8809.

Change 0x88-09 to 0x8809. This change is also needed on pp. 88, 89, 92, 95, and 97 (in tables on those pages). Note: alternatively, the notaion 'A8-C8', i.e., without the '0x' but with the hyphen, can be used.

The address 0x01-80-C2-00-00-02 should be written without the '0x', i.e., as 01-80-C2-00-00-02.

Change 0x01-80-C2-00-00-02 to 01-80-C2-00-00-02. The change is also needed on pages 88, 89, 92, 95, and 97 (in the tables on those pages).

In the last line in the right-most column of Table 8A-4, the phrase "Filled with zerous when not used" is used. According to a Google "Merriam-Webster" search, "zerous" is not a word.

Proposed to change "zerous" to "zeros" (supposedly, either zeros or zeroes is the plural of zero, according to "Webster;" I think zeros is more common). The last cell of the right most column of Table 8A-10 (p. 96) and Table 8A-12 (p.98) uses similar wording and both use the word "zeros"
